SUBSTANCE ABUSE ASSESSMENT, INTERVENTION, TREATMENT AND PREVENTION SERVICES

The Adult/Adolescent Treatment Program offers quality professional outpatient chemical dependency services for adults, youth and their families. We provide a full range of services such as assessment, prevention education, outpatient counseling and continuing care. In Addition, we offer community support groups, parent education and family counseling.

Assessments: Licensed Addiction Counselors provide chemical dependency evaluations and make specific recommendations for adults and youth, and facilitate referrals if needed. We can provide a complete and comprehensive chemical dependency evaluation irrespective of the family's financial situation.

Counseling: Our experienced counselors provide substance abuse-focused individual, family and group counseling offered at different levels of intensity depending upon the needs of the individual. Standard outpatient care provides one to two hours of services per week. Each adult or adolescent actively participates in treatment planning, processes and reviews.

Liaison Services/Case Management: On an as-needed basis, adolescents and adults can receive case management services. Other professionals coordinate services, communication, assistance with accessing other services and advocates for the client and his/her family.

Adolescent Treatment Program: The program offers quality professional outpatient chemical dependency services for youth and their families. We provide a full range of services such as assessment, prevention, education, outpatient counseling and continuing care.
